

LIBYA

INFORMATION ECOSYSTEM

opsmapia

At OPSMAPIA, we have a proven track record of providing unparalleled information ecosystems explicitly tailored for the Libyan market. We have created a portfolio of solutions for Libya that are unmatched in the industry thanks to our significant experience. We are sure that we can assist our customers in achieving their objectives.

STAY INFORMED

At OPSMAPIA, we pride ourselves on providing a continuous feed of meaningful information relevant to significant security and political events throughout the day, 365 days a year.

We created our products to make it easier for you to make decisions since we know how expensive it can be to make decisions without having all the information you need. OPSMAPIA does the information-heavy lifting, allowing you to redirect your valuable time and energy to concentrate on other pertinent matters.

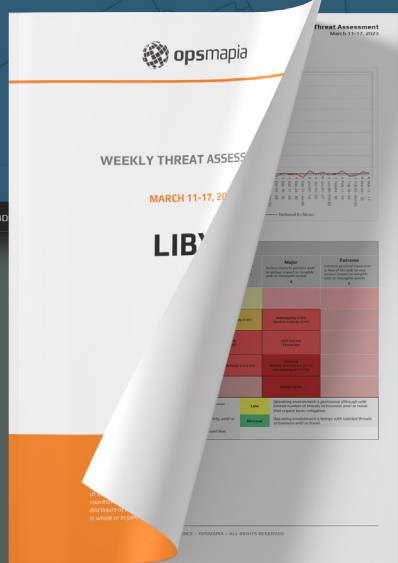

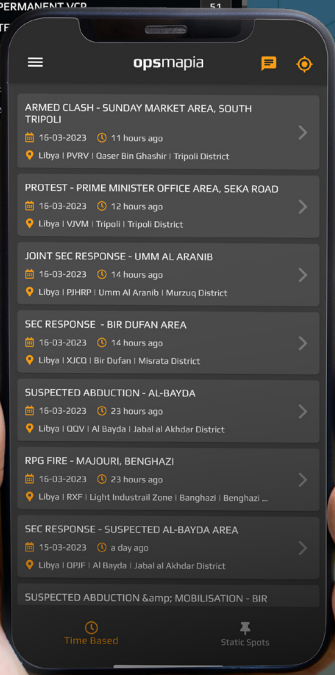

SUBSCRIPTION SERVICES FOR LIBYA

Our in-house information ecosystem for Libya includes various products, such as our web and mobile apps and daily, weekly, and monthly security reports. These products were developed from the ground up by our leading GIS experts and former police and armed forces professionals.

The screenshot displays the opsmapia web interface. On the left, a 'Spot Manager' sidebar lists various incident categories with counts: SIGNIFICANT INCIDENTS (21), CRIME ALERT (7), HOME INVASION (0), ARMED ROBBERY (1), CARJACK (0), KIDNAP (4), THEFT (2), INFRASTRUCTURE ALERTS (1), POSSIBLE INCIDENT (1), SECURITY INCIDENTS (11), TERRORISM ALERT (1), TRAVEL ALERT (0), WEATHER ALERT (0), SECURITY OPERATIONS (9), AIR FORCE (0), HEIGHTENED SECURITY (0), MILITARY (0), NAVY (0), POLICE (9), VCP (60), PERMANENT VCP (53), HOT (0), and SIGN (0). The main map shows a region in Libya with labels for Soudo Al Jum'aa, Al Bivio, Ed Dachla, Tajoura, Ain Ya, Sidi Bin al Bashiri, Castelverde, and Qaryat Su al Jum'at. A red circle highlights a specific incident in Tajoura. On the right, a 'Spot Details' panel provides information for a 'KIDNAPPING & TORTURE - AL-AZIB, TAJOURA' incident. The details include: COUNTRY: Libya, DATE & TIME (UTC): 2023-03-14 17:49:13, LAT/LNG: 32.769859 13.472556, MGRS: 33S US 56936 26806, LOCATION TAGS: QFCMRH, Tajoura, Tripoli District, and a DESCRIPTION: 'TAJOURA REVOLUTIONARIES - Kidnapping and torture of two Libyan youth by six alleged Chadian nationals, reported March 13-14. The perpetrators are said to have been arrested by local security forces.' It also shows an IMPACT LEVEL INDICATOR (ILI) of 4/9 (Low to moderate impact) and a SOURCE RELIABILITY & INFORMATION CREDIBILITY (SRIC) of B/2 (Usually reliable / Propably true).

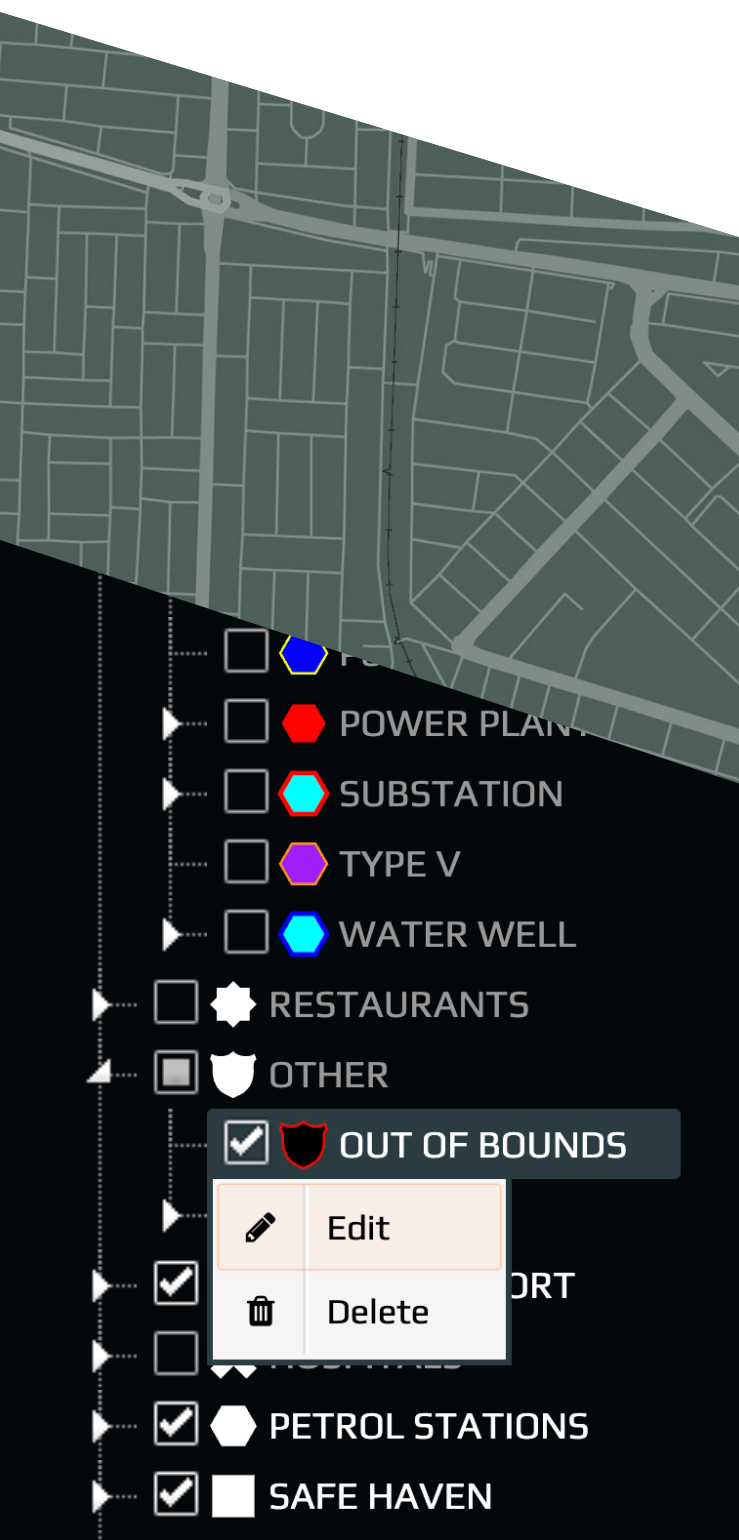

Email + Reports

Daily and weekly security reports authored by our professional analyst team.

MAKE IT YOURS

Our unique mapping system allows operations room personnel to easily create and define their spot structure to fit any custom needs. The spots and associated information are visually and audibly shared within the company/organisation in real-time.

STAY INFORMED ON THE GO

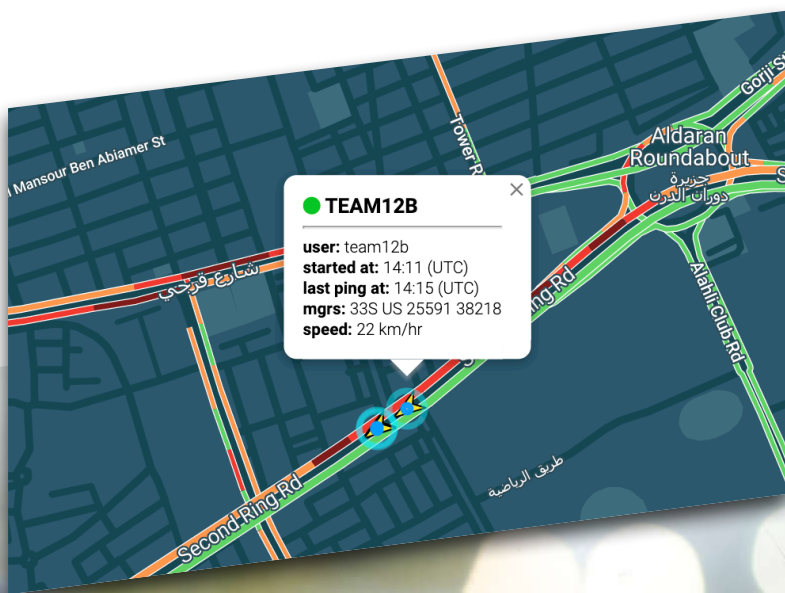

The OPSMAPIA app equips operators with state-of-the-art technology for enhanced situational awareness. Our skilled team of analysts and operations room personnel diligently monitor and assess various data sources, ensuring that users receive timely and corroborated Security Alerts on significant incidents. This comprehensive approach empowers operators to make well-informed and rapid decisions in response to unfolding events.

REAL-TIME TRACKING

The OPSMAPIA app offers advanced Real-Time Tracking, improving operator safety and efficiency. With accurate location sharing, optional messages, and images, it enables optimal coordination. Users can activate the Panic SOS Alarm for swift assistance, making the app a powerful, professional solution for security and operational efficiency.

QUALIFIED & EXPERIENCED ANALYST TEAM

OPSMAPIA recognises the significance of knowledge and its potential to empower. Therefore, we have a dedicated team of international analysts and Libyan national personnel who work tirelessly to keep you informed. Our team of global analysts comprises experts with diverse educational and professional backgrounds, including former military professionals and political science graduates, offering a range of perspectives on the issues. Additionally, our team of Libyan national personnel brings invaluable insights into the current situation across the country.

TAILORED SERVICES FOR LIBYA

At OPSMAPIA, we offer tailored services for the Libyan market to help businesses and individuals navigate the complex landscape of political, business and security risks. Our services include geographical, company, individual, and security risk assessments.

Our geographical assessments comprehensively analyse the Libyan landscape, including political, economic, and social factors that could impact your business. We help organisations understand how geopolitical trends affect their business and provide insight that shuns groupthink and bias to bring clarity and confidence to your strategic decisions.

FOCUS ON YOUR BUSINESS

Our business assessments help organisations to identify opportunities and manage risks, enabling them to shape the future of their organisation in Libya. For you to make educated decisions about your company operations in Libya, we can offer in-depth research on market trends, competition, and regulatory needs.

In addition, our assessments help organisations to identify potential employees or partners who may pose a security risk. We provide thorough background checks and due diligence reports, allowing you to make informed decisions about whom to do business with in Libya.

At OPSMAPIA, we understand the importance of managing security risks in a complex and ever-changing landscape. Our reviews include threat and vulnerability assessments, risk management plans, and crisis management strategies.

Whether you are looking to expand your business operations in Libya or need to understand better the security risks you face, OPSMAPIA has the expertise and knowledge to help.
